

# Escape the summer heat – visit Icebar

*Bratislava has a new cool underground bar. And by cool we mean really cool.*

In the heart of the Old Town of Bratislava, in one of the historical buildings on Panská Street, you can find the Tesla Coffee & Bar. Don't walk past it because under the bar the coolest place in Bratislava is hidden – the **ICEBAR**. And by cool we really mean cool.

The Icebar's interior is entirely made of crystal clear ice. Over 40 tons of ice was used to create the eternal north pole under the street of Bratislava. The temperature inside the Icebar is  $-7^{\circ}\text{C}$  all year around. The visit to the bar, with the entry fee of 10E per person, is limited to 20 minutes, and don't worry, you can rent a warm jacket and hand gloves for free. And another treat for your 20 minutes in the ice cold bar is a Vodka shot, just one, just to keep you warm, and is also included in the entry fee.

The visit of the Icebar is a perfect and cool idea for your congress guests to keep them cool in the hot summer months. But don't forget to make a **reservation**. It might get busy down under, in that hidden little piece of north pole in the middle of Bratislava.
